

Subject: Important: Yard Clutter and Debris Standards

As part of our shared responsibility to keep our properties safe, clean, and compliant, it's essential that we all adhere to the established standards for yard maintenance and clutter control.

Please review the attached standards carefully and make any necessary adjustments to your property. Consistent compliance helps us avoid enforcement actions and promotes a positive environment for everyone.

Why This Matters:

Uncontrolled clutter and debris can create health and safety hazards, attract pests, and diminish the overall appearance of our community. By following these guidelines, we ensure a clean, safe, and welcoming environment for everyone.

Key Expectations:

- Store items not designed for outdoor use indoors or in enclosed structures.
- Keep trash in closed, rodent-proof containers and out of public view when possible.
- Maintain vegetation within local code limits and remove overgrowth.
- Do not store inoperable or unregistered vehicles outdoors.
- Address any conditions that block emergency access or foster pest activity immediately.

If you have questions or need clarification, feel free to reach out. Thank you for your cooperation in keeping our community safe and attractive.

Best regards,
